

CARLISLE'S

# Roof Edge Products (ME)

**International Building Code Compliant**

Carlisle SynTec

# Get an Edge on the Elements

Faced with a constant barrage of wind and rain, the roof edge is a low-sloped roof system's first line of defense against Mother Nature. Unfortunately, more than 75% of all low-sloped roof failures can be attributed to faulty or poorly installed roof edge materials.

With Carlisle SynTec's full line of prefabricated roof edge products, properly securing the roof edge has never been easier or more reliable. **All of Carlisle's roof edge products have been tested and proven to meet the ANSI/SPRI ES-1 roof edge standard set forth in the International Building Code (IBC).** This comprehensive standard, which has already been adopted by the majority of the country, requires roof edge products to meet or exceed previously determined wind-resistance ratings.

## Building Codes Require ES-1-Test Roof Edges

Unlike shop-fabricated roof edging, Carlisle's prefabricated roof edge products ensure that your building is up-to-code and ready to handle the storm. They feature:

- Consistent, high-quality protection
- Snap-on covers eliminate external fasteners
- ES-1 approved (RE-1, RE-2, and RE-3 test methods)
- Factory Mutual (FM) approval
- Miami-Dade approved (No. 08-0604.02 12/11/13) to comply with "High Velocity Hurricane Zone of the Florida Building Code"

## Go with the Leader in Roofing Technology

Carlisle offers its roof edge products in a variety of colors and finishes, but one thing always remains the same – dependability.

- Backed by Carlisle's 45-year history
- Covered under industry-leading warranties
- Part of a comprehensive roof system, including membrane and insulation

## SecurEdge 200 Coping

- FM 1-90 Approved
- Miami-Dade approved (No. 08-0604.02 12/11/13) to comply with "High Velocity Hurricane Zone of the Florida Building Code"
- Single-source, full roof system warranty
- Full snap-on design and 12' lengths simplifies installation with no crimping
- No unsightly cover plates

<b>Gauges Available</b>
24 Ga. - Steel
0.040 - Aluminum
0.050 - Aluminum
0.063 - Aluminum
<b>Coatings Available</b>
27 standard pre-finish Kynar
<b>Components Included</b>
Fasteners, Splice Plates, Drivers
<b>Warranties Available with Edge System</b>
Full System: 20-year, 110-mph wind speed warranty
20-year painted finish

- Dual non-curling sealant strips allow for thermal movement
- Pre-punched fastening holes ensure proper installation
- Factory-fabricated accessories improve aesthetics
- RE-3 blow-off resistance: 24 Ga. & .040 – 140 lbs/ft<sup>2</sup>
- RE-3 blow-off resistance: .050 & .063 – 180 lbs/ft<sup>2</sup>

## SecurEdge 200 Fascia

- FM 1-195 Approved
- Single-source, full roof system warranty
- Non-penetrating system eliminates stripping in and improves performance
- 12' lengths simplifies installation and lowers costs

<b>Gauges Available</b>
24 Ga. - Steel
0.040 - Aluminum
0.050 - Aluminum
0.063 - Aluminum
<b>Coatings Available</b>
27 standard pre-finish Kynar
<b>Components Included</b>
Fasteners, Splice Plates, Drivers
<b>Warranties Available with Edge System</b>
Full System: 20-year, 110-mph wind speed warranty
20-year painted finish

- Factory-fabricated accessories improve aesthetics
- RE-1: passed
- RE-2 blow-off resistance: 150 lbs/ft<sup>2</sup>

## SecurEdge 1000 Fascia

- FM 1-405 Approved
- Single-source, full roof system warranty
- Non-penetrating system eliminates stripping in and improves performance
- .050 aluminum retainer terminates membrane at edge unlike other pre- or shop-fab products

<b>Gauges Available</b>
24 Ga. - Steel
0.040 - Aluminum
<b>Coatings Available</b>
27 standard pre-finish Kynar
<b>Components Included</b>
Fasteners, Splice Plates, Drivers
<b>Warranties Available with Edge System</b>
20-year, 110-mph wind speed warranty
20-year warranty for painted finish covering color fade, chalk and film integrity.

- 12' lengths simplifies installation and lowers costs
- Factory-fabricated accessories improve aesthetics
- RE-1: passed
- RE-2 blow-off resistance: 310 lbs/ft<sup>2</sup>

## SecurEdge 2000 Standard Fascia

- FM 1-645 Approved
- Miami-Dade approved (No. 08-0604.02 12/11/13) to comply with "High Velocity Hurricane Zone of the Florida Building Code"
- Non-penetrating system eliminates stripping in and improves performance
- Can be removed and reused without compromising performance

<b>Gauges Available</b>
24 Ga. - Steel
0.040 - Aluminum
<b>Coatings Available</b>
27 standard pre-finish Kynar
<b>Components Included</b>
Fasteners, Splice Plates, Drivers
<b>Warranties Available with Edge System</b>
20-year, 155-mph wind speed warranty
20-year warranty for painted finish covering color fade, chalk and film integrity.

- 4" – 8.5" face heights to accommodate multiple nailers
- 12' lengths simplifies installation and lowers costs
- Factory-fabricated accessories improve aesthetics
- RE-1: passed
- RE-2 blow-off resistance: 470 lbs/ft<sup>2</sup>

## SecurEdge 2000 Extended Fascia

- FM 1-270 Approved
- Miami-Dade approved (No. 08-0604.02 12/11/13) to comply with "High Velocity Hurricane Zone of the Florida Building Code"
- Non-penetrating system eliminates stripping in and improves performance
- Patented, aluminum extruded bar creates ultimate membrane termination at roof edge. Features a center rib to eliminate oil canning

<b>Gauges Available</b>
0.050 - Aluminum
0.063 - Aluminum
<b>Coatings Available</b>
27 standard pre-finish Kynar
<b>Components Included</b>
Fasteners, Splice Plates, Drivers
<b>Warranties Available with Edge System</b>
20-year, 155-mph wind speed warranty
20-year warranty for painted finish covering color fade, chalk and film integrity.

- 8.5" – 13" face heights to accommodate multiple nailers and eliminate extender
- 12' lengths simplifies installation and lowers costs
- Factory-fabricated accessories improve aesthetics
- RE-1: passed
- RE-2 blow-off resistance: 190 lbs/ft<sup>2</sup>

## SecurEdge 2000 Canted Fascia

- FM 1-270 Approved
- Miami-Dade approved (No. 08-0604.02 12/11/13) to comply with "High Velocity Hurricane Zone of the Florida Building Code"
- Non-penetrating system eliminates stripping in and improves performance
- Patented, aluminum extruded bar creates ultimate membrane termination at roof edge. Features a center rib to eliminate oil canning
- Canted design ensures the flange is kept out of the waterline
- Available in Existing Beveled Wood Nailers and Galvanize Waterdam versions

<b>Gauges Available</b>
0.050 - Aluminum
0.063 - Aluminum
<b>Coatings Available</b>
27 standard pre-finish Kynar
<b>Components Included</b>
Fasteners, Splice Plates, Drivers
<b>Warranties Available with Edge System</b>
20-year, 155-mph wind speed warranty
20-year warranty for painted finish covering color fade, chalk and film integrity.

- Large face heights eliminate need for fascia extenders
- 12' lengths simplifies installation and lowers costs
- Factory-fabricated accessories improve aesthetics
- RE-1: passed
- RE-2 blow-off resistance: 190 lbs/ft<sup>2</sup>

## SecurWeld™ Heat-Weldable Drip Edge

- Prefabricated PVC- or TPO-coated metal edging
- Heat-weld membrane directly to edge – no need to "strip in"
- Concealed splice plate for smooth, unbroken appearance
- ANSI/SPRI ES-1 Certified

<b>Gauges Available</b>
24-gauge galvanized steel
<b>Colors Available</b>
White, gray and tan
<b>Sizes Available</b>
2.5", 4", 6.5" & 8" faces
<b>Components Included</b>
Continuous clip, splice plate, cover & fasteners
<b>Warranties Available with Edge System</b>
Inclusion in Carlisle's Golden Seal® Total System warranties
Up to 20-year warranty on workmanship and coating
20-year, up to 80-mph wind speed warranty
